Episode: CLent5x2016

Text: John 12:1-8

Six days before the Passover Jesus came to Bethany, the home of Lazarus, whom he had raised from the dead. 2 There they gave a dinner for him. Martha served, and Lazarus was one of those at the table with him. 3 Mary took a pound of costly perfume made of pure nard, **anointed Jesus' feet, and wiped them with her hair.** The house was filled with the fragrance of the perfume. 4 But Judas Iscariot, one of his disciples (**the one who was about to betray him**), said, 5 "Why was this perfume not **sold for three hundred denarii** and the money given to the poor?" 6 (He said this not because he cared about the poor, but because he was a thief; he kept the common purse and used to steal what was put into it.) 7 Jesus said, "Leave her alone. She bought it so that she might keep it for the day of my burial. 8 **You always have the poor with you, but you do not always have me.**"

Math - Logical/Mathematical		<p>How much is the perfume worth? 300 denarii = 300 days wages. SSA reports 2014 <a href="#">national average wage index</a> is 46,481.52. There are about <a href="#">250 working days a year</a>, so <math>46481/250 = 185.92</math>. Multiply by 300 = 55,777.20. The pound referred to is in Greek a <a href="#">litra, or about 12 oz.</a> So the pure nard ointment cost 4648.1 per oz., which by a quirk of math is 1/10 the national average wage. The number of work days per year may vary would almost certainly be higher in the ancient</p>
